# CYP Mental Health Surge

In **2020/21** South East CYP MH services saw a significant surge – with a number of areas seeing over **70% increase in referrals**

NHS Benchmarking predicts a **further 20-60% surge** in CYP MH demand in **2021/22** and based on the SE surge data from previous year, we are expected to be at the top end of that surge in demand within the South East e.g. c. 50-60%.

In particular, community **Eating Disorder services** are experiencing significant pressure and containing most of this pressure in community i.e. preventing escalation to Tier 4

# Questions for our consideration together

- What local community volunteer or workforce do we have in place already who could be further supported to grow a further emotional/mental health offer to children?

What support would they need (e.g. investment, training, etc).

- What are the barriers for Third Sector staff and local authority to take up CYP IAPT training?

What could we do differently?

- Would there be an appetite for Mental Health Trusts to work with Third Sector partners to put in place more formal workforce pipelines?

i.e. staff get recruited/employed by third Sector and will have opportunity to be put forward for training programmes such as CWP, nurse associate and apprenticeships.
